RE: Burggrabe Masonry

To whom it may concern,

Over the last ten years, we have completed 27 projects with Burggrabe Masonry. The two largest projects were Grandville High School (completed in 1997) and Caledonia High School (completed in 2004). These two projects represent over \$10,565,000 in masonry contracts. All completed projects total over \$20 million and projects currently in process are on schedule.

Burggrabe Masonry has always been timely in their submission of shop drawings, bulletin pricing and project closeout documents. They staff their projects as promised and are a willing team player when coordinating work with other trades.

We look forward to continuing our relationship with Burggrabe Masonry. Should you need any additional information, please feel free to call either David Beckering or myself.

Respectfully submitted,

Beckering Advisor Incorporated
